

Modern Botany

Filesize: 9.38 MB

Reviews

It is one of the best pdf. It is written in straightforward words and never difficult to understand. It has been designed in an extremely straightforward way and it is just following it that I finished reading this book through which basically modified me, affected the way I believe.
(Deonte Abbott III)

MODERN BOTANY

DOWNLOAD

Scientific Publishers, 2008. Softcover. Book Condition: New. The present book is a text book on modern topics of Botany. The first chapter of this book is on plasma membrane, wherein, details of transport mechanism is discussed. There are three sections in this book. Section I deals with the biochemistry and metabolism. Section II covers developmental physiology and the Section III is on plant biotechnology. In this section, Ti plasmid, transposable elements and transgenic plants are discussed in details. In this book there are separate chapters on bioinformatics and biosignalling. The text of this book is based on biochemical, physiological and molecular aspects, along with the modern and emerging ideas in Botany. Contents: 1. Plasma membrane Structure, Membrane Model, Movement across cell membrane. Translocators, Pumps, Ion Channels, Aquaporins. SECTION I : BIOCHEMISTRY AND METABOLISM 2. Metabolism and Bioenergetics Metabolism, The Energy state of cell, Laws of Thermodynamics, Free Energy, Components of Electron Transport System, Electron Transport Chain, Phosphorylation. 3. Cell Biochemistry Covalent, Non covalent bonds, Hydrogen bonds, Polar and non polar molecules, Acid Base and Buffers. Biochemistry of Carbohydrate: Monosaccharides, Diasaccharides, Polysaccharides, Starch, Cellulose, Pectin. Biochemistry of Amino acid. Biochemistry of Proteins: Protein Structure. Biochemistry of Lipids: Fats, Steroids, Phospholipids. Biochemistry of Nucleic acid, Nitrogenous Base, Nucleoside and Nucleotide. Biosynthesis of purine and pyrimidine. 4. Enzyme Nomenclature and Classification, Mechanism of Enzymatic reaction, Michaelis Menton equation, enzyme activity energy concept, general properties. 5. Photosynthesis Historical background, Hill reaction, Red drop and Emerson effect, Photobiology, Photochemistry, Energy transfer, Light Harvesting, Photosynthetic unit and Reaction center. Thylakoid and location of pigments. Photosystem, Physiology of PS II, Role of cytochrome b6 f, Physiology of PS I, The electron transport system, photophosphorylation, Physiology of Photophosphorylation, ATP synthase. C3 plants: Calvin cycle, Enzymes of RPP, stoichiometry and energetics, regulation of calvin cycle, Sucrose synthesis, Starch synthesis....
