

Minimax Methods in Critical Point Theory with Applications to Differential Equations Lectures: Regional Conference

Filesize: 7.73 MB

Reviews

It is one of my personal favorite pdf. Of course, it really is play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Nicholas Ratke)

MINIMAX METHODS IN CRITICAL POINT THEORY WITH APPLICATIONS TO DIFFERENTIAL EQUATIONS LECTURES: REGIONAL CONFERENCE

American Mathematical Society. Paperback. Book Condition: new. BRAND NEW, Minimax Methods in Critical Point Theory with Applications to Differential Equations Lectures: Regional Conference, Paul Rabinowitz, The book provides an introduction to minimax methods in critical point theory and shows their use in existence questions for nonlinear differential equations. An expanded version of the author's 1984 CBMS lectures, this volume is the first monograph devoted solely to these topics. Among the abstract questions considered are the following: the mountain pass and saddle point theorems, multiple critical points for functionals invariant under a group of symmetries, perturbations from symmetry, and variational methods in bifurcation theory. The book requires some background in functional analysis and differential equations, especially elliptic partial differential equations. It is addressed to mathematicians interested in differential equations and/or nonlinear functional analysis, particularly critical point theory.
