Excerpt: .our friends matter as their nonmatter in motion. We shall then find that our senseimpressions of hardness, weight, colour, temperature, cohesion, and chemical constitution, may all be described by aid of the motions of a single medium, which itself is conceived to have no hardness, weight, colour, temperature, nor indeed elasticity of the ordinary perceptual type. This would mean an immeasurably great advance in our scientific power of description. Yet if physicists even then persist in projecting the conceptual into the sphere of sense-impression, and in asserting a phenomenal existence for the ether, we should still be ignorant of what it is that moves, of what ether-matter may really consist in. 1 I venture to think Sir William Thomson s attempt to weigh ether a retrograde step (see his Lectures on Molecular Dynamics, pp. 206-8, Baltimore, 1884). If the ether be a sufficiently wide-embracing...
